## Summary

A passionate web developer with over 4 years of experience in designing, developing, integrating & deploying web-based applications specializing in Laravel framework & Vue.js. Skilled in leveraging Laravel's powerful features & Vue.js reactive architecture to deliver high quality solutions.

I thrive on solving complex challenges & am always up-to-date with the latest industry trends and best practices. I have worked on wide range of projects from small-scale applications to large enterprise-level applications.

## Experience

### Laravel & Vue.js Developer

Futuresoft Technology Pvt. Ltd. — Aug 2023 – Present

- Built and maintained news portals and travel booking platforms, ensuring high performance, scalability, and secure transactions.
- Developed Vue.js and Nuxt.js applications with reusable components, SSR for SEO, and optimized page load times.
- Set up and managed VPS hosting (DigitalOcean) including deployment, server configuration, SSL, and monitoring.
- Improved application speed and stability through database query optimization and code refactoring.
- Implemented real-time features using WebSockets for instant data updates and improved user interaction.

### Laravel Developer

Ninja Infosys Pvt. Ltd. — May 2021 – July 2023

- Developed scalable & maintainable web applications
- Designed & built RESTful APIs using laravel & integrated them with vue js.
- Developed & implemented user authentication system for web applications using laravel, ensuring secure access & role-based permissions.
- Maintained and enhanced existing projects, ensuring their stability, performance, and security.
- Troubleshooting & debugging code issues.

## Education

**Banke Bageshwori Campus**

Bsc. CSIT

**Public Gyan Jyoti Higher Secondary School**

Isc(+2 Science)

## **Skills**

- Strong knowledge of PHP with OOP concept & latest Laravel framework.
- Proficient in front-end technologies: Vue.js, Nuxt.js, HTML, CSS, Bootstrap, and jQuery.
- Extensive experience in database management with MySQL, Redis and PostgreSQL.
- Skilled in building and consuming RESTful APIs.
- Solid understanding of server management, including deploying and maintaining applications on VPS (Virtual Private Server) environments.
- Experienced with testing frameworks such as PHPUnit and Pest. Proficient in debugging complex issues.
- Familiar with version control systems, specifically Git.
